News

Read More

Read More

Read More

Read More

This page will utilize additional features:
Dropdown Navigation Bar
Read More Button
Cutout Text
Media Queries to Adjust Nav Bar Display

https://amarshall110.github.io/OM475/webpresence/home.html

This responsive dropdown navigation bar allows the user to hover the mouse over any of the navigation bar options, as well as hover over the "My Time at NIU" segment to display a list of the grouped web pages. This feature is included on every page.

The Read More Button on this page hides a section of the paragraph text until the user clicks on the "read more" button on screen.

The Cutout text is included in the header for each page, and it creates a cutout of the text so that the background image shows through a white box as the text color, making the text appeared cut out.

Additionally, the media query adjusts the nav bar display to show just the first option "Home" and a hamburger icon when the screen width decreases past a certain point to prevent clustering of the navigation bar.
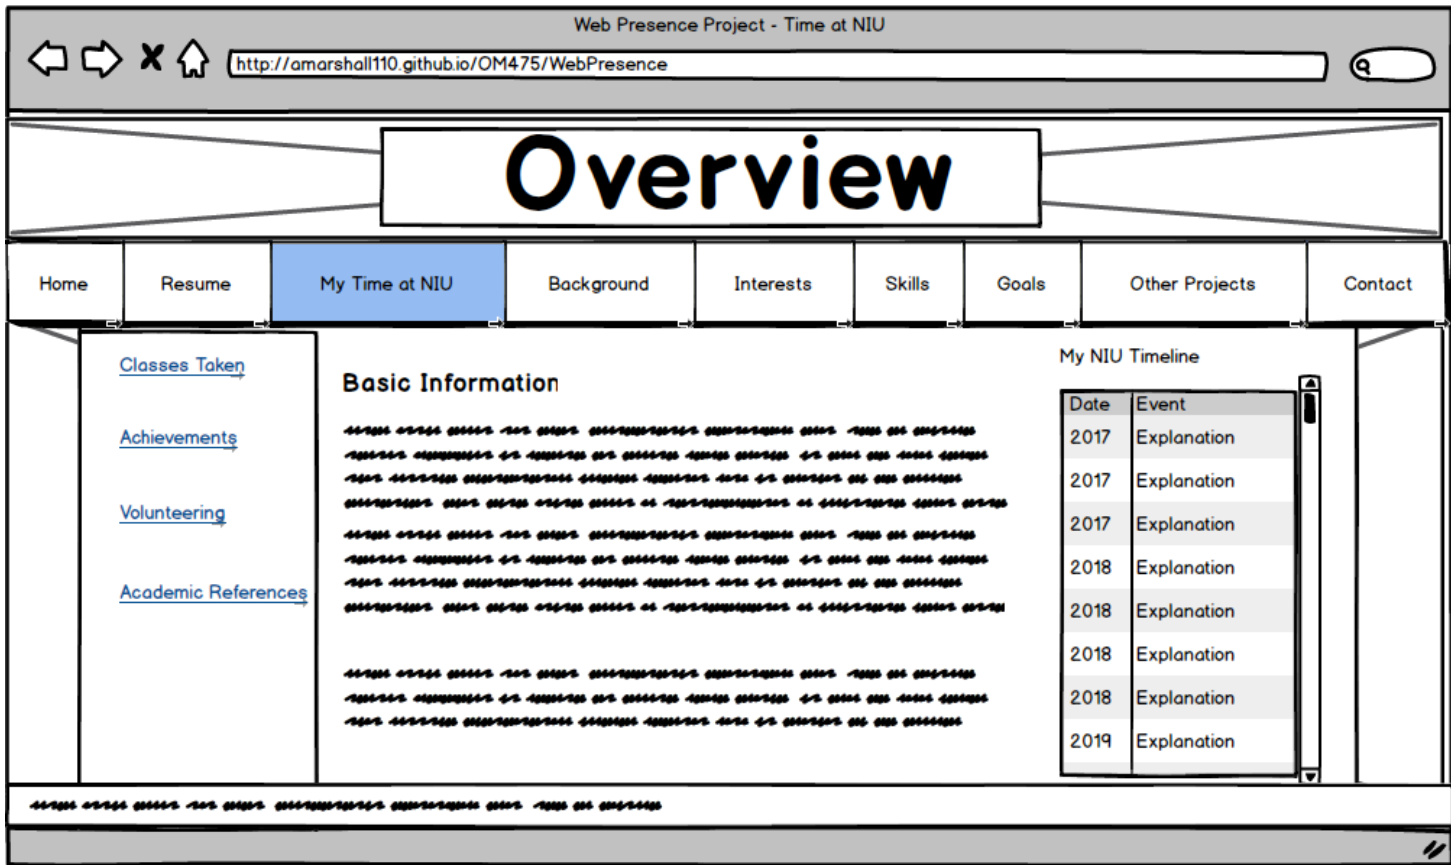

Each page is tied to the CSS file "styles", which includes the ../images/file linking structure for the background image and header image
